R.E.S.P.E.C.T.

We treat our teammates, customers and partners with integrity and value relationships that we build.
While created as a utility, we have grown to be an enormous source of valuable data. This brilliance does not come with ego. Rather, the brand is clearly modest while focused on passion and integrity to provide the best tools and data to our customers. However, like any geek born in New York, we still have a lot of fun. It’s more than work hard, play hard that makes us who we are.

Our voice reflects who we are. Like Bitlinks, we value brevity. As a company impassioned by insight and intelligence, our materials reflect our commitment to empowering others. To exemplify the Bitly persona, write actively and passionately, but never superfluous.
Bitly’s link management platform helps the world’s leading brands deliver and measure their marketing efforts across all marketing channels. Through the power of the link, Bitly connects customers to the best digital experience possible, harnessing functionality like branded bitlinks, mobile deep linking and omnichannel campaign tracking to provide a complete marketing solution that drives customer experience.

**BITLY BRAND TOOLS**

Bitly Brand Tools are the must-have for marketers to fuel branding, engagement and understanding in the connected world.

**Branding:** Boost CTR by 34% with branded links. Gain key insights by tapping into the Bitly Network and understand how your audience interacts with your content—even when you’re not involved.

**Mobile:** Direct the links you share across all channels to the right content based on the device, ensuring your customers have the best experience every time.

**Campaigns:** Build cross-channel campaigns and understand the customer journey through one report that tracks every customer touchpoint.
We’ve created some guidelines to help you use our brand and assets. To make any use of our marks in a way not covered by these guidelines or for any commercial reasons, please contact us at onbrand@bitly.com and include a visual mockup of intended use.

Please don’t use our name, logos, or screenshots (“brand materials”) in ways that may be confusing, misleading or suggest our sponsorship, endorsement or affiliation. For example, your name and logo should be more prominent than the Bitly logo.

You can use our brand materials for educational and instructional purposes, but please remember that it shouldn’t be confusing or misleading, or suggest our sponsorship. We generally don’t allow use of our logos or screenshots on book covers, for example.

ALWAYS MAINTAIN PROPORTIONS
The proportions and spacing of the Bitly logotype should never be altered for any reason. Hold the “Shift” key in most software programs to maintain the proportions while scaling up or down. Please don’t edit or change the Bitly logo — we like it how it is!

IN WRITING
Bitly is one word with a capital B with the rest of the word lowercase. The name is always one word and bit.ly should only be used when referencing bit.ly links, although those are technically Bitlinks ;-) Write Bitly in plain text rather than embedding the logo into text.

Chauncey McPufferson is our mascot. Chauncey is reflective of our brand personality, and our users and employees rally behind him. We don’t use him in combination with our logo and he should never be used in place of our logo. We use him sparingly across marketing materials, as he represents the personality of the brand but not the business. Chauncey always faces right, no matter the situation, ensemble or emotion. We use different Chauncey personalities for moments in which we want our users to be surprised, or we want to draw attention to something.

**BRAND COLORS**

Bitly Orange is our primary color. We use Bitly Orange to clearly signify the presence of Bitly in people’s lives, and to help our users immediately identify us. We also rely heavily on Bitly Navy, Bitly Blue, and Bitly Light Blue. We have a select set of secondary grays that help the primary Bitly colors stand out.
BRAND FONTS
Our brand fonts are Brandon Grotesque (used for headlines) and Proxima Nova (used for body copy). Brandon Grotesque was designed by Hannes von Döhren of HVD Fonts and is used to evoke a friendly yet authoritative tone. Proxima Nova was designed by Mark Simonson Studio and is known to be a hybrid combining humanistic proportions with a slightly geometric appearance, used to communicate reliability and authenticity.

HEARTLINES
HEADLINE GOES HERE. ALWAYS IN ALL CAPS AND PRIMARILY IN BITLY BLUE.

BODY COPY

LINE DRAWINGS
Our primary visual language is centered around vector line drawings. The most common illustrations represent various things such as links, branding, mobile deep linking, social media, campaigns, engineering and omnichannel marketing. These are typically represented in two-color: grey and orange. When the icons are used less than 1 inch or 80px, they drop to single-color icons.
PRODUCT IMAGES
The Bitly Product should always be represented on Bitly Light Blue within the appropriate device and browser illustration. These images can be used for blog posts, press releases, or any other story featuring Bitly.
